- Built using Bootstrap 4.
- Responsive for all devices and browsers.
- Email input validation.
- All fields required.

Case 2

Page loads with a url with querystring with param imageURL=http://exampleimagelocation. This is used to display the image.

EMAIL *

FIRST NAME *

LAST NAME *

COMPANY *

SEND

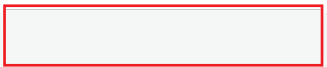

User enters email address which autofills the firstname / lastname and company.

Eg James.Bell@MyCompany.com would fill in

First Name: James
Last Name: Bell
Company: MyCompany.

Use a regular expression to split split the name.
The name should be able to be split on "." or "-" or "_".
